Western Governors University Announces New Scholarship for IT Professionals

Up to \$3,000 Available for IT Professionals Enrolling in the Online University's College of Information Technology

Salt Lake City — Western Governors University is making it easier for current IT professionals to finish their bachelor's degrees; the online university has announced a new scholarship program, the WGU Information Technology Professionals Scholarship.

WGU is ideal for busy IT professionals with full-time jobs and family obligations. Degree programs are all online and competency-based, allowing students to study when they have the time and to advance when they demonstrate proficiency rather than by earning credits for time spent in classes.

All of WGU's Information Technology programs include industry-recognized certifications, including CIW, CCNA, MCITP, OCA, and CompTIA. In addition, WGU is a Microsoft IT Academy member, which allows the university to offer students world-class technology curriculum and courseware provided by Microsoft.
